Bring you the
2010 Community Forum:
Understanding and Preventing Window Falls
Among Children

Tuesday, November 9, 2010
8:00 am – 1:00 pm

The Children's Hospital at Legacy Emanuel Medical Center
Lorenzen Auditorium, 301 N. Graham St.
Portland, Oregon 97227

Forum Description

Every year, about 50 children under the age of 13 are entered into Oregon's Trauma System for a fall from a second-story window. This forum will highlight the issues around pediatric window falls by providing experts from other areas of the country that have tackled the issue, sharing what efforts have been undertaken in Oregon, and beginning discussions on the next steps we can take as a community.

Forum Goals

- To describe the problem of child injury and death due to falls from windows.
- To consider the full range of countermeasures: education, engineering, enforcement.
- To identify local stakeholders and interested parties.
- To develop a local window safety coalition to take the next steps in prevention.

Target Community Partner Audience

- Public Health, Medicine, Nursing, Legal
- Injury Prevention and Emergency Responders
- Fire and Life Safety, Health Educators
- Property Management and Real Estate Inspectors
- Building Code Councils, Architects, Engineers
- Window/Screen Manufacturers, Safety Device Manufacturers
- Parents, Grandparents and Childcare Providers
- Media

Agenda

- 8:00 - 8:30 Registration
8:30 - 8:45 Welcome & Introductions
